

STOCKOSORB LG

SUPER WATER ABSORBENT

IMPROVES SOIL WATER HOLDING CAPACITY IN NURSERY AND LANDSCAPE APPLICATIONS.

MEASURING SCOOP PROVIDED FOR EASY APPLICATION.

ACTIVE INGREDIENT:

Acrylamide Potassium Acrylate Copolymer100%

KEEP OUT OF REACH OF CHILDREN

CAUTION

May be harmful if swallowed. May cause irritation to eyes and skin. Do not breathe dust. Wash thoroughly after handling. Extremely slippery conditions are created if this product is spilled and comes in contact with water. Clean up spilled material at once.

TRANSPLANTING SHRUBS AND TREES: Mix 1/2 of STOCKOSORB in planting hole and 1/2 in backfill material. Use the amounts indicated on the following table:

Containerized	Oz. by Weight	Approximate
		Oz. by Volume
1 Gallon	1/3 oz.	1/2 oz. (1 TBS)
3 Gallon	3/4 OZ.	1 1/4 OZ.
5 Gallon	1 oz.	1 1/2 oz. (1 scoop)
7 Gallon	1 1/2 oz.	2 1/2 oz. (fez scoops)
10 Gallon	2 oz.	3 oz. (2 scoops)
15 Gallon	3 oz.	4 1/2 oz. (3 scoops)
20 Gallon	4 oz.	6 oz. (4 scoops)
25 Gallon	5 oz.	7 1/2 oz.
30 Gallon	6 oz.	9 oz.
35 Gallon	7 oz.	10 1/2 oz.
50 Gallon	8 oz.	12 oz.
65 Gallon	9 oz.	13 1/2 oz.
100 Gallon	12 oz.	18 oz.
200 Gallon	20 oz.	30 oz.
400 Gallon	36 oz.	54 oz.

Caliper		
1"	2 oz.	3 oz.
2"	3 oz.	4 1/2 oz.
3"	6 oz.	9 oz.
4"	3 oz.	12 oz.
5"	12 oz.	18 oz.
6"	16 oz.	24 oz.
7"	20 oz.	30 oz.
8"	24 oz.	36 oz.

STOCKOSORB LG (100) is the large granule form of a super water adsorbent, made from synthetic polymers. It will absorb almost 200 times its own weight in water and will remain active for several years in the soil. These special properties of STOCKOSORB LG can reduce the frequency of watering and lead to improved plant growth under drought conditions. STOCKOSORB LG can be used in the nursery production of most plants and in the landscape installation of turf, bedding plants, foliage, shrubs and trees.

DIRECTIONS FOR USE

NURSERY AND GREENHOUSE PRODUCTION:

SOIL MIXES: Use 2 lbs. per cu. yd. of media. Mix thoroughly in media. (2 lbs. is approximately 1 1/2 qts. by volume). Soil media will swell 20% when watered, fill pots accordingly.

PLANTING BEDS: Use 1 lb. per 100 square feet and incorporate to a depth of 6 inches.

TURF INSTALLATION: SODDING AND SEEDING use 3 1/2 lbs. per 1,000 square feet or 150 lbs. per acre. Broadcast evenly with fertilizer spreader and, if possible, incorporate 1 - 2 inches deep.
